Summary

IT undergrad & ML Engineer specializing in predictive modeling and explainable AI (Python, XGBoost, SHAP). Built the Kaizen Credit Risk Platform (32k+ records, 93% accuracy) with an enterprise validation layer and automated PDF reporting. Interned in Data Science at Foyer Tech, delivering full-stack dashboards and NLP pipelines that directly impacted business efficiency.

Education

Rajalakshmi Engineering College Bachelor of Technology in Information Technology	Chennai, India CGPA: 8.2/10 — Expected May 2028
SBOA School and Junior College Class XII (CBSE)	Chennai, India 89% — May 2024
SBOA School and Junior College Class X (CBSE)	Chennai, India 85.6% — May 2022

Experience

Foyer Technology Pvt. Ltd. Data Science Intern	Chennai, India Dec 2025
- Performed EDA, feature engineering, and statistical analysis (hypothesis testing, distribution analysis) on 1,048,576 FMCG sales records using Python, Pandas, and NumPy to identify key demand drivers and seasonal patterns. - Benchmarked Random Forest, XGBoost, and CatBoost for sales forecasting using R^2 score (Random Forest achieved the best performance) and built interactive Streamlit dashboards to present model insights and business trends.	

Technical Projects

Kaizen Credit – Credit Risk Analyzer <i>Python, Flask, XGBoost, SHAP, Plotly, Render</i> - Trained XGBoost classifier on 32,581 loan records to predict default risk, achieving 93.19% accuracy and 83% F1-score for high-risk borrowers. - Integrated SHAP explainability to generate feature-importance plots for transparent, data-driven credit decisions. - Built and deployed full-stack Flask web app with automated PDF reporting (ReportLab); live at kaizen-credit.onrender.com
FMCG Sales Forecasting <i>Python, Pandas, Scikit-learn, XGBoost, CatBoost, Streamlit</i> - Built end-to-end demand forecasting pipeline on 1M+ retail sales records; performed EDA, feature engineering, and data cleaning using Pandas and NumPy. - Benchmarked Random Forest, XGBoost, and CatBoost for next-week demand prediction; evaluated models using R^2, MAE, and RMSE. - Developed interactive Streamlit dashboard for real-time predictions and trend visualization. <i>GitHub:</i> github.com/Pratul-V/fmcg-sales-forecasting

Skills

- Programming Languages:** Python, Java, C, JavaScript, SQL, R
- Data Science & Machine Learning:** Pandas, NumPy, Scikit-learn, XGBoost, SHAP, Matplotlib, Plotly, Statistics, Predictive Modeling, Explainable AI
- Web Development:** Flask, Streamlit, Node.js, Express.js, ReactJS, REST APIs
- Databases:** MySQL, PostgreSQL, MongoDB
- Tools & Platforms:** Git, GitHub, Azure, Render, Railway, Vercel, VS Code
- Core Computer Science:** Data Structures, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming
- Soft Skills:** Leadership, Public Speaking, Team Collaboration, Event Management, Problem Solving

Certifications

- Introduction to Information Technology and AWS Cloud, Amazon Web Services, 2025
- Generative AI for Data Science, Microsoft, 2025
